Reviews

This is the very best publication we have read through right up until now. It is one of the most incredible book we have read through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Miss Celia Volkman)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Original publisher: Washington, DC : U. S. Environmental Protection Agency, Office of Research and Development, 2005 OCLC Number: (OCoLC)320970927 Subject: Fills (Earthwork) -- Research -- South Carolina. Excerpt: . . . Practicing Leachate Recirculation and Air Injection Chapter 1 Project Description and Objectives 1. 1 Background There has been much concern over the potential hazards of landfill gas emissions. The predominant component of landfill gas emissions is methane, which is highly flammable and has been identified as a major greenhouse gas implicated in global warming. Another issue with landfill emissions is odor nuisance complaints due to trace constituents. Recently, research has begun on operating bioreactor landfills. The bioreactor process involves the injection of liquid such as leachate or sludge into the Figure 1-1. Survey Area at the Three Rivers waste mass. In the case of aerobic bioreactor landfills, air is injected into the waste mass in addition to the liquid to induce aerobic microorganisms to decompose, injecting air into the waste in order to stimulate the waste more rapidly. The goals of this aerobic conditions within the landfill to initiate and technique are to increase landfill space (resulting in maintain the rapid decay of waste. The survey area is more cost-effective landfill practices), to bring the approximately 60 feet deep and consists of about waste as close to full maturation as is feasible with 70,000 cubic yards of waste and daily cover. the technology, and to eliminate potential environmental threats due to concentrated leachate and The focus of this study is to evaluate emissions of hazards associated with methane gas production. fugitive gases such as methane and hazardous air pollutants (HAPs) at the site...
