

Egypt, Energy and the Environment: Critical Sustainability Issues (Hb)

By -

Adonis & Abbey Publishers. Hardcover. Book Condition: New. Hardcover. 340 pages. Dimensions: 9.2in. x 6.1in. x 0.8in. Pure environmentalism and pure resource exploitation can be integrated together to form an encompassing sustainability solution. This is the main message of this book based on an innovative structure-concentration-incentives methodology applied to Egypt. This methodology provides a basis for achieving environmental sustainability based on endogenous source-driven forces of change in contrast to the traditional effects-dominant oriented approach. Though the books methodology could be used as a framework of analysis in environmental sustainability research for any developing country, Egypt provides a rich case study because of its historical, socio-economic, and political constructs. Sustainable development is generally seen as a tradeoff between resource efficiency and social equity such that total resource essentials in society can become sustainable in the long run in a manner that meets the needs of current generations without compromising the ability of future generations to meet their own needs. Environmental sustainability cannot be implemented without the direct inclusion of structure (form), concentration (effect), and incentives (drivers) as critical policy choices because: (1) they constitute a necessary condition in any countrys path towards sustainable development, (2) they must be implemented simultaneously as a...
